Course Overview

This Infection Prevention & Control awareness training course is aimed at staff working within the care environment. Individuals will understand the importance of why we need to have infection control measures implemented in the workplace. At the end of this course learners will be able to state the obligations and responsibilities that should be performed when dealing with infection control issues. In addition to this, candidates will be able to demonstrate and explain hand washing techniques along with having an understanding of maintaining a clean environment.

Entry requirements

To register for this training learners are required to meet the following entry requirements:

- Must be aged 16 and over

Recommended

- On-line Infection, Prevention & Control
- On-line Video Infection, Prevention and Control

Qualification Progression

Successful learners can complete a relevant apprenticeship or progress to other qualifications such as the Highfield Level 2 Award Certificate in Infection, Prevention and Control (RQF) or Level 2/3 Diploma in Adult Care.

Learning Outcomes:

- Understand the definition of Infection, prevention and control
- Know how individuals become infected through the chain of infection
- Identify different types of germs and infection
- Understand the importance of infection control and the management
- Demonstrate how to wash hands effectively and appropriately
- Demonstrate when to use personal protective equipment (PPE)
- Understand the importance of policy and legislation regarding infection control

Delivery model

To complete the Infection Prevention & Control Awareness training learners must complete the following:

- Half day classroom delivery

Certificates of attendance will be provided after learners successfully complete the course.
